PROFILE

Full-Stack Software Engineer who builds complete web applications, from databases to user interfaces, with a focus on clean, tested, and maintainable code. I've developed projects integrating AI features, APIs, and real-time collaborative systems. I learn quickly and adapt easily to a team's tools and working methods.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Three.js, Tailwind CSS
Backend: Node.js, Express.js, NestJS, FastAPI, ASP.NET Core
Programming Languages: TypeScript, JavaScript, Python, Java, C#, C, SQL
AI / Machine Learning: NLP, LLMs, RAG, Embeddings
Databases: PostgreSQL, MySQL, MongoDB
Cloud / DevOps: Docker, GitHub Actions (CI/CD), Vercel, Render
Testing: Jest, Supertest, Playwright
Tools & Methodologies: Git, Linux, Postman, Agile/Scrum

PROFESSIONAL EXPERIENCE

- Full-Stack Developer Intern** | Trinovatech | Monastir, Tunisia Feb 2026 – May 2026
- Developed DocuMind across seven Agile/Scrum sprints, from architecture design to deployment.
 - Developed frontend and backend features, adjusting priorities based on stakeholder feedback.
 - Set up automated tests, Docker containerization, and the CI/CD pipeline.
- Full-Stack Developer Intern** | SWConsulting | Monastir, Tunisia Jun 2025 – Jul 2025
- Analyzed a production system used by banking clients to identify business logic bottlenecks.
 - Separated financial rules from the core codebase, enabling pricing logic updates without redeploying the application.
 - Developed full-stack features as part of an Agile team.

PROJECTS

- DocuMind** – AI-Powered Document Management Platform (Final-Year Project)
Technologies: Next.js, NestJS, PostgreSQL/pgvector, Prisma, RAG, Socket.IO, Stripe, Docker
- Designed a multi-workspace document platform with role-based access control, isolating data by workspace, folder, and member.
 - Integrated a RAG pipeline for querying documents, alongside real-time collaborative editing, conflict handling, automated testing, and CI/CD deployment.
- AutoValu** – AI-Powered Used Car Price Analyzer
Technologies: Next.js, Tailwind CSS, FastAPI, Python, XGBoost, KNN
- Collected and cleaned over 3,000 used-car listings in Tunisia to train price-prediction models.
 - Developed a prediction system combining KNN with two specialized XGBoost models, exposed through a FastAPI API and integrated with an admin dashboard.
- Secure Medical Teleconsultation Platform**
Technologies: React, Node.js, Express, MongoDB, WebRTC, Stripe
- Developed an MVC-based telemedicine platform featuring real-time video consultations and administrator approval of doctors.
 - Managed the complete appointment lifecycle, including booking, Stripe payments, consultations, and medical record generation.

EDUCATION

- Engineering Degree in Software Engineering** | EPI – International Multidisciplinary School | Sousse, Tunisia 2021 – 2026
Five-year engineering program, including the Preparatory Cycle in Technology and Computer Science (2021–2023)
- Baccalaureate in Technical Sciences** | Bourguiba High School | Monastir, Tunisia 2019

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations** – Dec 2024
- Cisco CCNA: Switching, Routing, and Wireless Essentials** – Jun 2024
