• Monastir, Tunisia • +216 58 221 658

PROFILE

Full-stack software engineer who likes turning complex problems into simple products that solve real problems. I've built complete applications independently from the database to the interface, with a focus on writing code that's clean, tested, and easy for other developers to pick up. Fast learner, comfortable adapting to a team's tools and way of working.

EDUCATION

Engineering Degree — Software Engineering <i>EPI – International Multidisciplinary School, Sousse, Tunisia</i>	2023 – 2026
Preparatory Cycle, Technology & Computer Science <i>EPI – International Multidisciplinary School, Sousse, Tunisia</i>	2021 – 2023
Baccalaureate, Technical Sciences <i>Bourguiba High School, Monastir, Tunisia</i>	2019

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern — Trinovatech • Owned end-to-end development of the team's flagship project across 7 Agile/Scrum sprints, from architecture to deployment. • Worked independently across frontend and backend, adjusting priorities each sprint based on stakeholder feedback. • Set up automated testing, Docker, and the CI/CD pipeline used throughout development.	<i>Feb 2026 – May 2026 · Monastir, Tunisia</i>
Full-Stack Developer Intern — SWConsulting • Analyzed a production system used by banking clients to identify business logic bottlenecks. • Decoupled financial calculation rules from the core codebase, letting non-technical teams update pricing logic without a new deployment. • Delivered full-stack features as part of a collaborative Agile team.	<i>Jun 2025 – Jul 2025 · Monastir, Tunisia</i>

PROJECTS

DocuMind — AI-Powered Document Management Platform (Final-Year Project) <i>Next.js • NestJS • PostgreSQL/pgvector • Prisma • RAG • Socket.io • Stripe • Docker</i> • Built a multi-workspace platform with role-based access control (RBAC), isolating data by workspace, folder, and member. • Integrated a RAG pipeline so users can ask questions and get answers grounded in their own documents. • Implemented real-time collaborative editing with conflict handling. Tested, containerized with Docker, and deployed via CI/CD.
AI-Powered Used Car Price Analyzer <i>Next.js • NestJS • FastAPI • Python • XGBoost • KNN</i> • Collected and cleaned a dataset of 3,000+ Tunisian car listings to train price-prediction models. • Designed a KNN routing system between two specialized XGBoost models, connected to the app via a FastAPI microservice with an admin dashboard.
Secure Medical Teleconsultation Platform <i>React • Node.js • Express • MongoDB • WebRTC • Stripe</i> • Built a telemedicine platform (MVC architecture) with real-time video consultations and admin approval flow for doctors. • Handled the full appointment lifecycle: booking, Stripe payment, consultation, and automatic medical record generation.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, NestJS
Languages: TypeScript, JavaScript, Python, SQL
AI / Machine Learning: NLP, LLM, RAG, XGBoost, KNN, SVM
Databases: PostgreSQL, MongoDB
Cloud / DevOps: Docker, GitHub Actions (CI/CD), Vercel, Render
Testing: Jest, Supertest, Playwright
Tools: Git, Linux, Postman, Agile/Scrum

CERTIFICATIONS

AWS Academy Graduate - Cloud Foundations — Dec 2024 • Cisco CCNA: Switching, Routing & Wireless Essentials — Jun 2024
